ST THOMAS A BECKET RC PRIMARY SCHOOL

ONLINE SAFETY

Children and young people spend a lot of time on the internet.

They may go online to research information for homework or to play games, using specific apps and chat with friends (if within the correct age group).

The internet hosts many exciting and enriching opportunities for our pupils. It is a boundless source of information, entertainment and creativity. We want to encourage our children to make use of this valuable resource, but like the real world there are risks and dangers that we should be aware of and act to protect them from.

Click on the links below for our online safety guides:

National Online Safety Guides

E-Safety for Pupils

The NSPCC also offers lots of helpful tips and advice which parents can use to keep their children safe on the internet and social networks.

The link below outlines the risks and dangers children face when using the internet:

NSPCC Online Safety

SCHOOL ONLINE RULES

Within school, children are taught to follow a set of online safety rules as part of our Computing curriculum as well as being aware of it in everyday life.

Our Shine Online awards were presented to children who have shown good skills, attitude and safety whilst working online.

HOW TO SET UP PARENTAL CONTROLS

Parental controls can help keep your child safe.

Even the most innocent searches online can bring up not so innocent results. Parental controls can be used to block upsetting or harmful content. They can also help to control online purchases or manage how long your child spends online

The NSPCC have made setting up parental controls really easy:
